

THE GUIDELINES FOR AUTHORS

Folia Medica Indonesiana publishes original articles in basic and clinical medicine. Articles can be classified as original research report, case report/ case series, randomized controlled trial, review (scoping review, systematic review, or invited literature review), and meta-analysis that keep the readers informed of current issues and innovative studies. Submitted manuscripts are considered for publication with the condition that they have not been published or being submitted for publication elsewhere. The manuscript must be written in American-English with proper grammar. The use of grammar-checker applications is mandatory for any non-native authors. The manuscript should be written by the structure as in the [Document Template](#). The Document Template includes a [CTA & Author's Declaration](#) form that the manuscript does not contain fabricated, falsified, and plagiarized text and/ or data, that the manuscript has never been published before and is not under consideration for publication by another party, and that all authors have agreed on the final form of the manuscript. All authors involved in making the manuscript must agree to the statement sheet outlined by the [International Committee of Medical Journal Editors \(ICMJE\)](#).

The Editorial Board reserves the right to edit all articles in aspects of style, format, and clarity. Authors may be required to revise their manuscripts for reasons of any aspects. Manuscript with excessive errors in any aspects may be returned to the author for revising or may be rejected. All manuscripts will be subjected to editorial review prior to a double-blind peer-review by at least two independent reviewers.

All types of manuscript must consist of:

Title, must be concise, specific, and informative. The title must consist of no more than 30 words, written on the top line with bold Times New Roman font size 11, uppercase, and left-margin.

Abstract must be written in English in one paragraph with no more than 300 words. Abstract of original research report, randomized controlled trial, scoping review, systematic review or meta-analysis must contain background, objective, materials and methods, results, and conclusion, while the abstract of case report or case series must contain background, objective, case(s), discussion, and conclusion.

Keywords should consist of 3-6 words and/or phrases, written below the abstract as seen in the template, in English, started with a capital letter (sentence case), separated with semicolon, and without an ending point. The keywords must contain

at least one keyword of [Sustainable Development Goals \(SDGs\)](#). Authors can use terms present in Medical Subject Headings (MeSH) as the keywords.

Running title (other and shorter version of the full title), corresponding author and address must be written accordingly (see [Document Template](#)).

Highlights of the manuscript should consist of minimally two key points representing the novel contributions of the study and must not be the copy-paste and/or repetition of sentences of any other parts of the manuscript. The highlights should be written using numbers before the introduction under the subheading "Highlights".

Strength and limitations. Before the conclusion, the authors should describe the strength of the study that may include the findings, the novelty of the topic and methodology, and the contribution of the study. In addition, the limitations of the study should also be described that may include the lack of access to information or resources, the limited time of the study, and the size of the population. Suggestions for further studies can also be included in this part.

The submitted manuscript should be addressed to the Editor-in-chief of Folia Medica Indonesiana in the [Cover Letter](#).

Manuscript Types and Organizations

Original Research Report

Original research reports a substantial body of laboratory or clinical work, presenting the outcome of a large trial, case control, observational or retrospective study. The authors must confirm in the manuscript that they have ethical clearance for the conduct of the reported research. The procedure in the research should be in accordance with the [Declaration of Helsinki](#). The ethical clearance should be submitted along with the manuscript. The manuscript should be approximately 3500 words.

Total number of tables and figures are limited, advisably not more than five, and references are minimally 20 from the last 10 years before the date of submission. The text consists of Abstract, Highlights, Introduction, Materials and Methods, Results, Discussion, Strength and limitations, Conclusion, Acknowledgement, Conflict of Interest, Funding Disclosure, Author Contribution, and References.

Randomized Controlled Trial

Original research reports a substantial body of laboratory or clinical work, presenting the outcome of a large trial, case-control, observational or retrospective study. The authors must confirm in the manuscript that they have ethical clearance for the conduct of the reported research. The procedure in the research should be in accordance with the [Declaration of Helsinki](#). The ethical clearance should be submitted along with the manuscript. The manuscript should be approximately 3500 words. Total number of tables and figures are limited, advisably not more than five, and references are minimally 20 from the last 10 years before the date of submission. The text consists of Abstract, Highlights, Introduction, Materials and Methods, Results, Discussion, Strengths and limitations, Conclusion, Acknowledgement, Conflict of Interest, Funding Disclosure, Author Contribution, and References.

Case Report/Case Series

Case report/case series highlights important innovations with wide applicability or previously unpublished complications of new techniques or medications. The authors must confirm in the manuscript that they have obtained written permission of those whose case is being presented. The manuscript should be approximately 3500 words. Total number of tables and figures are limited, advisably not more than five, and references are minimally 20 from the last 10 years before the date of submission. The text consists of Abstract, Highlights, Introduction, Case Report/Case Series, Discussion, Strength and limitations, Conclusion, Acknowledgement, Conflict of Interest, Funding Disclosure, Author Contribution, and References.

Review Article

This type of manuscript includes Scoping Review, Systematic Review, or Invited Literature Review. **Scoping Review** is composed to synthesize evidence and assess the scope of literature on a specific topic. This type of article also helps to determine whether a systematic review of the literature is warranted. **Systematic Review** involves a detailed and comprehensive plan and search strategy derived a priori, to reduce bias by identifying, appraising, and synthesizing all relevant studies on a particular topic. Folia Medica Indonesiana publishes high-quality systematic review products including systematic review protocols, systematic reviews related to a very broad definition of medicine (basic and clinical), rapid reviews, updates of completed systematic reviews,

and research methods related to the science of systematic reviews, such as decision modelling. Appropriate methodology should be followed, such as [CASP](#), [GRADE CERQual](#), [PRISMA](#), [PRISMA-SC](#), and [PROSPERO](#), the online international register for systematic reviews. The manuscript should be approximately 3500 words. Total number of tables and figures are limited, advisably not more than five, and references are minimally 20 from the last 10 years before the date of submission. The text consists of Abstract, Highlights, Introduction, Materials and Methods, Results, Discussion, Strength and limitations, Conclusion, Acknowledgement, Conflict of Interest, Funding Disclosure, Author Contribution, and References.

On the other hand, **Invited Literature Review** provides a detailed and comprehensive narrative analysis of recent developments in a specific topic in medicine and highlights important points that have been previously published. The text consists of Abstract, Introduction, highlights, any subheadings as needed by the author(s), Strength and limitations, Conclusion, Acknowledgement, Conflict of Interest, Funding Disclosure, Author Contribution, and References. The text is relatively long compared to other paper categories, typically up to 15 manuscript pages or 4,000 words with approximately 30-50 reference list to comprehensively cover all the major published work.

Meta-Analysis

Meta-analysis is a statistical analysis combining the results of multiple scientific studies, analyzing multiple scientific studies addressing the same question, with each individual study reporting measurements that are expected to have some degree of error. The total number of tables and figures are limited, advisably not more than five, and references are minimally 20 from the last 10 years before the date of submission. The text consists of Abstract, Highlights, Introduction, Materials and Methods, Results, Discussion, Strength and limitations, Conclusion, Acknowledgement, Conflict of Interest, Funding Disclosure, Author Contribution, and References.

References

References are advisably not to exceed 35 in number but not less than 20, and should in general be limited to the last ten (10) years from the submission date. Avoid using abstracts as references. Information from manuscripts submitted but not yet accepted should be cited in the text as “unpublished observations” with written permission from the source. Papers accepted

but not yet published may be included as references; designate the journal and add “Forthcoming”. Avoid citing “personal communication” unless it provides essential information not available publicly, name the person and date of communication, and obtain written permission and confirmation of accuracy from the source of personal communication. Authors are recommended to use reference management software, in writing the citations and references such as Mendeley®, Zotero®, EndNote®, and Reference Manager®.
