VISION AND MISSION

Jurnal Medik Veteriner (JMV) with registered number pISSN 2615-7497 ; eISSN 2581-012X is an international journal published by Faculty of Veterinary Medicine, Universitas Airlangga and Indonesian Veterinary Medical Association (IVMA).

Jurnal Medik Veteriner (JMV) has been indexed in Scopus based on the decision of The Scopus Content Selection and Advisory Board (CSAB) on August 29, 2023.

Jurnal Medik Veteriner (JMV) has been awarded SINTA 2 from the Director General of Higher Education, Research and Technology, Ministry of Education, Culture, Research and Technology, Republic of Indonesia Number: 225/E/KPT/2022, on December 7, 2022.

Jurnal Medik Veteriner (JMV) publishes original research, review articles, short communication, and case reports on the scope of veterinary medicine which is published biannually year: April and October. This journal is contributed by practitioners, lecturers, researchers, students, and volunteers in the field of veterinary medicine. A submitted manuscript will be processed by the editorial board and reviewers. The peer review process is carried out through the Open Journal System (OJS). Complete information about the process of peer-reviewing manuscripts and guidelines for writing manuscripts is available on the website.

VISION

To become a leading and reputable international journal level in the field of veterinary science.

MISSION

1. Utilizing journals as a source of novelty and intellectual development for the academic community in supporting Universitas Airlangga World Class University;
2. Organizing accountable and quality journal management to improve the number of intellectual products;
3. Promoted as excellent references and indexed on reputable databases.

Jurnal Medik Veteriner (JMV) publishes high-quality and novelty papers focusing on Veterinary and Animal Science. The fields of study are anatomy, pathology, basic medicine, veterinary public health, microbiology, veterinary reproduction, parasitology, animal husbandry, and animal welfare. Food animals, companion animals, equine medicine, aquatic animals, wild animals, herbal medicine, acupuncture, epidemiology, biomolecular, forensic, laboratory animals, and animal models of human infections are considered. Studies with a systematic review and meta-analysis approach are highly appreciated.
