I. DESCRIPTION

Jurnal Ners provides a forum for original research and scholarships relevant to nursing and other health-related professions. Jurnal Ners is a scientific peer-reviewed nursing journal that is published biannually (April and October) by the Faculty of Nursing Universitas Airlangga, Indonesia, in collaboration with the Central Board of the Indonesian National Nurses Association.

The journal particularly welcomes studies that aim to evaluate and understand the complex nursing care interventions which employ the most rigorous designs and methods appropriate for the research question of interest. The journal has been publishing original peer-reviewed articles of interest to the international nursing community since 2006, making it one of the longest standing repositories of scholarship in this field.

Jurnal Ners offers authors the benefits of (1) A highly respected journal in the nursing field; (2) Indexed in major databases, such as [SCOPUS](#), Science and Technology Index (SINTA); Directory of Open Access Journal (DOAJ); (3) Rapid initial screening for suitability and editorial interest.

Jurnal Ners has been accredited by the Ministry of Science, Technology and Higher Education of Indonesia (RISTEKDIKTI RI) since 2010. The updated Accreditation Number: [85/M/KPT/2020](#), valid until 2024 ([download certificate](#)).

II. FOCUS AND SCOPE

The scope of this journal includes studies that intend to examine and understand nursing health care interventions and health policies which utilize advanced nursing research from the Asian perspective. Jurnal Ners publishes research related to clinical settings, community, and health policy in Asia from comparative and international views.

We aim to evaluate and understand the complex nursing care intervention on Fundamentals of Nursing, Clinical Nursing, Community, and mental health nursing. The journal also committed to improving the high-quality research by publishing analytic techniques, measures, and research methods, not an exception to systematic review papers.

IV. AUTHOR GUIDELINES

We now differentiate between the requirements for new and revised submissions. You may choose to submit your manuscript as a single Word file to be used in the refereeing process. Only when your paper is at the revision stage, will you be requested to put your paper into a 'correct format' for acceptance and provide the

items required for the publication of your article.

Selection of papers for publication is based on their scientific excellence, distinctive contribution to knowledge (including methodological development) and their importance to contemporary nursing, midwifery or related professions. Submission to this journal proceeds fully online, and you will be guided stepwise through the creation and uploading of your files.

The manuscript should be written in Ms. Word format. Figure, illustration, and picture are included in manuscript file. Submit manuscript directly to <http://e-journal.unair.ac.id/index.php/JNERS>. Jurnal Ners will automatically reject any manuscript submitted via email or hardcopy.

The Editorial Board determines feasible manuscript after obtaining recommendations from peer reviewers. Manuscript revision is author responsibility, and manuscripts that are not feasible will be returned to the author.

TYPES OF MANUSCRIPT

Original Articles

Original Articles should report on original clinical studies or research not previously published or being considered for publication elsewhere. The text should not exceed 7000 words, including a list of authors and their affiliations, corresponding author, acknowledgements and figure legends, with an abstract of a maximum of 250 words, a list of a minimum of 25 references primarily from international journals indexed by Scopus or Web of Science, and a maximum 5 figures/tables (see below for more details on the layout).

Systematic Reviews

Systematic Reviews are exhaustive, critical assessments of evidence from different data sources in relation to a given subject in the area of nursing. A systematic search of the relevant data sources should be carried out and the items collected should be carefully evaluated for inclusion based on *a priori* defined inclusion/exclusion criteria. A description and an analytical graphic representation of the process should be provided. The specific features of the participants' or patients' populations of the studies included in the review should be described as well as the measures of exposure and the outcome with indication towards the corresponding data sources. A structured abstract is required (the same as for short reviews). The text must not exceed 7,000 words including the acknowledgments, with no more than four tables and/or figures and a minimum of 40 references.

Meta-analyses

Meta-analyses should follow the same guidelines for systematic reviews. They are expected to provide exhaustive information and statistical assessment of the pooled estimates of pre-defined outcomes, study heterogeneity and quality, possible publication bias, meta-regression, and subgroup analyses when and where appropriate. Depending on the type of study, the authors are invited to submit PRISMA flow diagrams or MOOSE checklists. Both systematic reviews and meta-analyses will be dealt with as original articles are, as far as the editorial process is concerned.

ETHICS IN PUBLICATION

This journal follows the Committee of Publication Ethics (COPE) guidelines and requests authors to familiarise themselves with these guidelines at: <http://publicationethics.org/resources/guidelines>. A few issues that authors need to pay particular attention to are set out below. It is ethically questionable to break up or segment data from a single study to create different papers for publication, a practice called salami slicing. If the authors have legitimate reasons for reporting separately on different parts of the same study, or the same data set, they should justify that to the editor at the time of submission. Equally, readers need to be aware that different aspects of the same study are being reported, thus the methods section of the submitted manuscript must clearly explain why the submitted paper is justified.

DOUBLE-BLIND PEER REVIEW PROCESS

The decision to publish a paper is based on an editorial assessment and peer review. Initially, all papers are assessed by an editorial committee consisting of members of the editorial team. The prime purpose is to decide whether to send a paper for peer review and to give a rapid decision on those that are not. The rejection is based on the novelty or the relevancy with the scope of this journal.

Initial Editorial Assessment

Journal Ners is eager to provide a rapid publication process through an initial assessment conducted by an editorial committee consisting of the editorial team members. The primary purpose is to decide whether to send the paper for peer-review or to reject it. The main point is scope, compliance with the guideline, and language. Sometimes a paper will be returned to the author with a request for revisions with the purpose to help editors in deciding whether or not to send it out for review. Authors may expect the decision of the Initial Editorial Assessment from this stage of the review process within 1-2 weeks of submission.

Review Process

After passing the Initial Editorial Assessment, the article will be sent to peer-reviewers. The peer-review process involved at least two reviewers for each manuscript selected based on their expertise. All reviewing process is done by the double-blind review, which means the authors and peer-reviewers do not know each other's identity. The reviewers should complete the review within three weeks in each reviewing round after the review request was sent.

Decision-Making Process

The decision to accept for publication is based on the peer reviewer's recommendations, based on which two acceptance recommendations are required. If there is a difference in the two reviewers' recommendations, the editor has the right to seek the third reviewer's consideration. The final decision to publish is made by the editor-in-chief, editorial committee (national or international advisory board) by considering the advice from reviewers.

Review Criteria

Each paper that the editor/s assess as suitable for peer review is allocated to two reviewers who are asked to assess the paper against one of the Journal's three sets of reviewing criteria: Articles submitted for review must be original works, and may not be submitted for review elsewhere whilst under review for the Journal. After review, the Editor-in-Chief will inform the corresponding author on whether the paper has been accepted, rejected, or needs revision. Categories of decision Accept Minor revisions (accept with revisions as advised by Editors) Major revisions (possible acceptance following major revision and resubmission) Reject All efforts are made to provide fair and thorough reviews as speedily as possible. If an author(s) believes that a manuscript has been wrongly rejected, a detailed appeal letter that responds point-by-point to the reviewers' comments should be sent to the Editor who, after having reviewed the referees' reports, will make the final decision. Reviewed by Editor-in-Chief or Editorial Team only Letter to the Editor or a short comment on any topic of current interest For these types of submissions, the corresponding author will receive a fairly rapid decision on publication.

LANGUAGE

Please write your text in good English (British or American or other English style usage is accepted). Authors who feel their English language manuscript may require editing to eliminate possible grammatical or spelling errors and to conform to correct scientific English may wish to use the English Language Editing service. After receiving acceptance decision, author must send the manuscript to proofreaders that has been provide by Editor through this link <https://forms.gle/hdXUuGycvNTiC4cFA> . All of payment becomes author's responsibility.

PRODUCTION

Following acceptance of a manuscript; the corresponding author will receive an acknowledgement. The paper will then be edited to comply with house style, and typeset. The Publisher will email a proof to the corresponding author for checking before it is published. The corresponding author is responsible for checking proofs thoroughly. By approving the proofs any editorial changes are being accepted. We also provide printed issues of Journal Ners. To purchase the printed issues, please fill this form <https://goo.gl/forms/LuHOUtRVIXqoJybN2> and confirm your order to our Whatsapp on [+62 811-3287-877](https://www.whatsapp.com/business/profile/628113287877). Our committee will process your order as soon as possible after your confirmation.

SUBMISSION OF MANUSCRIPTS

All manuscripts, correspondence and editorial material for publication is submitted online at <http://e-journal.unair.ac.id/index.php/JNERS> simply need to "create a new account" (i.e., register) by following the online instructions, and using their own e-mail address and selected password. Authors can submit manuscripts online. Authors can expect an initial decision to undergo peer-review.

REVISED SUBMISSIONS

Authors are requested to submit the revision within one month for all reviewing process i.e. rapid decision or in review stage. If not, the submission will be removed from the editorial system and needs to be submitted as a new submission.

TITLE AND AUTHORSHIP

The title should describe the summary of the research (concise, informative, no abbreviations, and a maximum of 12 words).

The authorship of articles should be limited to those who have contributed sufficiently to take on a level of public responsibility for the content. Provided should be full names of authors (without academic title); author's affiliation [name(s) of department(s) and institution(s)]; the corresponding author's name, ORCID ID, mailing address, telephone, and fax numbers, and e-mail address. The corresponding author is the person responsible for any correspondence during the publication process and post- publication.

ABSTRACT

Abstracts should be less than 250 words, and should not include references or abbreviations. They should be concise and accurate, highlighting the main points and importance of the article. In general, they should also include the following:

- *Introduction:* One or two sentences on the background and purpose of the study.
- *Method:* Describe the research design, settings (please do not mention the actual location, but use geographic type or number if necessary); Participants (details of how the study population was selected, inclusion and exclusion criteria, numbers entering and leaving the study, and any relevant clinical and demographic characteristics).
- *Results:* Report the main outcome(s)/findings including (where relevant) levels of statistical significance and confidence intervals.
- *Conclusions:* Should relate to the study aims and hypotheses.
- *Keyword:* Provide between three and five keywords in alphabetical order, which accurately identify the paper's subject, purpose, method, and focus.

TEXT

The text should be structured as follows: introduction, methods, results, discussion, and conclusion. Footnotes are not advisable; their contents should be incorporated into the text. Use only standard abbreviations; the use of nonstandard abbreviations can be confusing to readers. Avoid abbreviations in the title of the manuscript. The spelled-out abbreviation followed by the abbreviation in parenthesis should be used on the first mention unless the abbreviation is a standard unit of measurement. If a sentence begins with a number, it should be spelled out.

ACKNOWLEDGMENT (OPTIONAL)

Acknowledgments should be limited to the appropriate professionals who contributed to the paper, including technical help and financial or material support, as well as any general support by a department chairperson.

TABLES AND FIGURES

Tables should be numbered in Arabic numerals; and any captions should be brief, clearly indicating the purpose or content of each table. If your manuscript includes more than five tables in total, or for very large tables, these can be submitted as Supplementary Data and will be included in the online version of your article.

SUBMISSION PREPARATION CHECKLIST

Indicate that this submission is ready to be considered by this journal by checking off the following (comments to the editor can be added below).

1. As part of the submission process, authors are required to check off their submission's compliance with all of the following items. Submissions may be returned to authors that do not adhere to these guidelines.
2. The author(s) haven't suggested any personal information that may make the identity of the patient recognizable in any form of description, photograph or pedigree. When the photographs of the patient are essential and indispensable as scientific information, the author(s) must have received the consent in written form and have clearly stated such.
3. In case of experimenting on humans, the author(s) have certified that the process of the research is in accordance with the ethical standards of the Helsinki declaration, as well as any domestic and foreign committees that preside over the experiment. If any doubts are raised as to whether the research proceeded in accordance with the Helsinki declaration, then author(s) are required to explain it. In the case of experimenting on animals, the author(s) have certified that the author(s) had followed the necessary domestic and foreign guidelines related to experimenting on animals in a laboratory.
4. The author(s) have received consent from the author or editor of any pictures or table quoted from other journals or books. A portion or the entirety of the article must not have been published in other journals, nor must it have contributed to other journals or is still under review.
5. The author(s) undersigned hereby give the Faculty of Nursing Universitas Airlangga the rights as publisher, the right of first publication of all published material. It will be licensed under a [Creative Commons Attribution 4.0 International License](#).
6. Author(s) of the journal have clarified everything that may arise such as work, research expenses, consultant expenses, and intellectual property on the document in relation to the [ICMJE form disclosure of conflicts of interest](#).

COPYRIGHT NOTICE

Authors who publish with Jurnal Ners agree to the following terms:

1. Authors transfer the Copyright and grant Jurnal Ners the right of first publication with the work

simultaneously licensed under a [Creative Commons Attribution 4.0 International License](#) that allows others to remix, adapt and build upon the work with an acknowledgment of the work's authorship and of the initial publication in Jurnal Ners.

2. Authors are permitted to copy and redistribute the journal's published version of the work (e.g., post it to an institutional repository or publish it in a book), with an acknowledgment of its initial publication in Jurnal Ners.

Jurnal Ners requires a formal written declaration and transfer of copyright from the author(s) for each article published. We, therefore, ask you to complete and return this form, retaining a copy for your own records. Your cooperation is essential and appreciated. Any delay will result in a delay in publication. The form can be downloaded [HERE](#).

PUBLICATION FEE

Jurnal Ners charges the author a publication fee amounted to IDR 3.000.000 (Indonesian author) and USD 200 (non-Indonesian author) for each manuscript published in the journal. The author will be asked to pay the publication fee upon editorial acceptance. We consider individual waiver requests for articles in our journal, to apply for a waiver please request one during the submission process to our email address. A decision on the waiver will normally be made within a week.

OPEN ACCESS POLICY

This Journal retains copyright but provides immediate open access to its content on the principle that making research freely available to the public supports a greater global exchange of knowledge.

- This journal (p-ISSN:[1858-3598](#); e-ISSN:[2502-5791](#)) is licensed under a [Creative Commons Attribution 4.0 International License](#).

PLAGIARISM CHECK

This journal follows the Committee of Publication Ethics (COPE) guidelines and requests authors to familiarise themselves with these guidelines at: <http://publicationethics.org/resources/guidelines>. Plagiarism is not acceptable in Jurnal Ners submissions. All the submitted manuscripts are checked for plagiarism before starting the review process.

V. TITLE PAGE

Regarding the double blind peer review policy, the author must separate any information about the author's identity from the main manuscript. Thus, all information related to the author(s) should be mentioned only on the title page. The title page must be uploaded in the Open Journal System (OJS) as supplementary file. ABSTRACT (Times New Roman 11)

The abstract comes after title page in the manuscript. Abstract must be integrated and independent which consists of introduction and purpose, methods, results, conclusion and suggestion. However, the abstract should be written as a single paragraph without these headers. For this reason, references should be avoided. Also, non-standard or uncommon abbreviations should be avoided, but if essential they must be defined at their first mention in the abstract itself. Abstract must be written using 150 until 250 words which has no reference and accompanied keywords.

DISCUSSION (Times New Roman 11)

Describe the significance of your findings. Consider the most important part of your paper. Do not be verbose or repetitive, be concise and make your points clearly. Follow a logical stream of thought; in general, interpret and discuss the significance of your findings in the same sequence you described them in your results section. Use the present verb tense, especially for established facts; however, refer to specific works or prior studies in the past tense. If needed, use subheadings to help organize your discussion or to categorize your interpretations into themes. The content of the discussion section includes: the explanation of results, references to previous research, deduction, and hypothesis.

.....

CONCLUSIONS (Times New Roman 11)

Conclusion should be explained clearly related to hypothesis and new findings. Suggestion might be added contains a recommendation on the research done or an input that can be used directly by consumer.
