Jurnal Ners is a scientific peer reviewed nursing journal which publishes original research and scholarship relevant to nursing and other health related professions, published by Faculty of Nursing Universitas Airlangga, Indonesia, in collaboration with Indonesian National Nurses Association, East Java Province.

Editor-in-Chief
Prof. Dr. Nursalam, M.Nurs (Hons)

Editor:
Ferry Efendi, S.Kep., Ns., M.Sc., PhD
Lailly Hidayati, S.Kep., Ns., M.Kep

Technical Editor:
Gading Ekapuja Aurizki, S.Kep., Ns.
Lingga Curnia Dewi, S.Kep., Ns., M.Kep.

EDITORIAL ADDRESS:
Faculty of Nursing Universitas Airlangga
Campus C Jln. Mulyorejo 60115 East Java, Indonesia
Phone/fax: (031) 5913257, 5913257, +62 812-5952-8787
E-mail: secretariat_jurnalners@fkp.unair.ac.id
Website: http://e-journal.unair.ac.id/index.php/JNERS

Publication Schedule
Jurnal Ners is published semi-annually (April and October).

Manuscript Submission
The manuscript should be written in Ms. Word format. Figure, illustration, and picture are included in manuscript file. Submit manuscript directly to http://e-journal.unair.ac.id/index.php/JNERS. Jurnal Ners will automatically reject any manuscript submitted via email or hardcopy.

Manuscript Publishing
The Editorial Board determines feasible manuscript after obtaining recommendations from peer reviewers. Manuscript revision is author responsibility, and manuscripts that are not feasible will be returned to the author.
ACKNOWLEDGEMENT TO REVIEWERS

The Editors gratefully acknowledge the assistance of the following people, who reviewed manuscripts for *Jurnal Ners*, Vol. 13 No. 1 April 2018.

1. **Dr. Abu Bakar, S.Kep., Ns., M.Kep., Sp.Kep.MB.**
   Universitas Airlangga, Indonesia
2. **Anna Kurniati, S.KM, MA**
   BPPSDMK, Ministry of Health, Indonesia
3. **Bayhakki, PhD, RN**
   Universitas Riau, Indonesia
4. **Dr. Chong Mei Chan**
   University of Malaya, Malaysia
5. **Elida Ulfiana, S.Kep., Ns., M.Kep.**
   Universitas Airlangga, Indonesia
6. **Dr. Farhan Alshammari**
   University of Hail, Saudi Arabia
7. **Dr. Hilmi Yumni, S.Kep., Ns., M.Kep., Sp. Mat**
   Poltekkes Kemenkes Surabaya, Indonesia

## TABLE OF CONTENT

1. **Collaborative Model of Teachers, Students, and Families to Improve Parents Knowledge and Skills on Food Safety of Elementary School Students**  
   Sigit Mulyono, Elly Nurachmah, Junaiti Sahar, Sabarinah Prasetyo  
   1-8

2. **Self-Care Training Improves the Attitudes and Skills of Caregivers for Children with Physical Disability**  
   Warti Ningsih, Purwanta Purwanta, Sri Hartini  
   9-17

3. **Family-Based Maternal Sensitivity Model as a Strategy to Optimize Family Perception on the Role of Parents and the Growth of Infants**  
   Diyan Indriyani, Susi Wahyuning Asih  
   18-23

4. **Responsive Feeding-Play (Resfeed-Play) Intervention on Children Aged 6-24 Months with Malnutrition**  
   Dwi Cahya Rahmadiyah, Agus Setiawan, Poppy Fitriyani  
   24-30

5. **Nurses Education and Motivation Towards Nursing Documentation**  
   Devi Mediarti, Rehana Rehana, Abunyamin Abunyamin  
   31-35

6. **Effects of Health Education on Leptospirosis Prevention Through Dasawisma**  
   Sri Mulyanti, Athanasia Budi Astuti  
   36-41

7. **The Influence of Peer Health Education Toward the Decreasing Risk of Heart Disease**  
   Riza Fikriana, Al Afik  
   42-49

8. **Self-Efficacy and the Competency of Nursing Students Toward the Implementation of Evidence-Based Practice**  
   Yusshy Kurnia Herliani, Hasniatisari Harun, Anita Setyawati, Kusman Ibrahim  
   50-56

9. **Comparison of Attitudes Towards Meditation Healing Exercise between the Elderly Living with Chronic Illness in Bangkok and Surabaya**  
   Ni Putu Wulan Purnama Sari, Jintana Artsanthia  
   57-63

EDITORIAL

Indonesia has had many positive changes since the Millennium Development Goals (MDG)—now Sustainable Development Goals (SDG) were enacted. One of Indonesia's targets is to reduce child mortality rate. According to the Ministry of Health of the Republic of Indonesia, the child mortality rate in Indonesia has decreased from 97 per 1000 live births in 1991 to 26.2 per 1,000 live births in 2015. These data portrays that Indonesia has seriously carried out its commitment to reduce child mortality. The success of these achievements certainly cannot be separated from the programs and strategies that have been pursued by the Indonesian government. The government efforts to run well cannot be separated from the important role of health workers as field implementers. Nurses as one of the health workers have a role in improving the health status of the community as optimal as possible through health promotion and disease prevention.

Behind the success of the government in reducing the mortality rate of children and toddlers, it seems that the government still finds some obstacles, as stated by the summary of UNICEF Indonesia's study in 2012 that inappropriate behavior and lack of knowledge of the community especially mothers in maintaining health is one of the factors influencing child mortality and toddlers. Nurses are a profession which based on the knowledge and specific abilities must be able to carry out health promotion at the preventive level, especially the health problems of children and toddlers, the importance of vaccination, as well as the prevention of stunting and malnutrition.
