Introduction

With thanks to Almighty God, finally volume 8 number 2 Journal of Public Health Research and Community Health Development can finally be published. Journal of Public Health Research and Community Health Development well known as JPH RECODE, is a journal published by Public Health Study Program, Faculty of Health, Medicine, and Life Science, Universitas Airlangga. Our journal is published biannually in October and March. JPH RECODE is on public health as discipline and practices related to preventive and promotion measures to enhance health of the public through scientific approach applying variety of techniques. This focus includes area and scope such as biostatistics and health population, epidemiology, health education and promotion, health policy and administration, environmental health, public health nutrition, sexual and reproductive health, and occupational health and safety. JPH RECODE was first published since October 2017 (Volume 1 Issue 1) with 6 manuscripts in 60 pages, then from March 2018 until now our journal has been publishing 10 manuscripts in every edition. Every edition now consists of 65-100 pages. Manuscripts are written in full English.

With the publication of article volume 8 number 2, the Journal of Public Health Research and Community Health Development has reached a significant milestone that has been published 2 years in a row 2 volumes with a total of 4 numbers. This is one of the absolute requirements in submitting the accreditation of national scientific journals through the ARJUNA system so that it is hoped that the Journal of Public Health Research and Community Health Development can be accredited and indexed in SINTA managed by Kemenristekdikti (Ministry of Science, Research, Technology and Higher Education of Indonesia). In article volume 8 number 2, there are writers domestically and abroad. The articles presented various topics such as: Epidemiology, Health Promotion and Behavior Science, Public Health Nutrition, Sexual and Reproductive Health, Environmental Health, Occupational Health and Safety, Health Administration and Policy, Biostatistics and Population Health, Health Care and Hospital Management

The existence of the Journal of Public Health Research and Community Health Development scientific journal which is applying for national accreditation (SINTA) is expected to be a lever on the development of communicative writing culture and scientific studies as well as the allure of readers and writers to participate in the Journal of Public Health Research and Community Health Development in future issues. Hopefully the thoughts and works displayed.
