## GUIDELINES FOR AUTHOR

**Jurnal Respirasi (JR)** publishes articles on all aspects of pulmonary- and respiratory-related disciplines. The manuscript is submitted directly to <https://e-journal.unair.ac.id/JR/index>. Manuscripts are considered for publication on the condition that they have not been previously published or submitted for publication by other journals. Articles can be classified as original articles, case reports, or literature reviews (including systematic reviews and meta-analyses) that inform readers about current issues, innovative cases, rare cases, and article reviews in the field of pulmonary and respiratory medicine. **JR** will automatically reject any manuscript submitted by e-mail or mail (letter). In addition, authors are requested to have [ORCID ID](#) upon submission to this journal.

The manuscript must be **less than 4000 words (exclude Abstract and References)**. The manuscript must be typed on a word processor and submitted in the form of a soft copy file. The obligatory **Times New Roman** font should be in size **14 pt for the title** and **12 pt for all other sections of text**. The title should be written in **bold, left-aligned**, the first letter in each word be **capitalized**, and **any Latin name is presented in italics**. The manuscript must be of **A4 format** typed with **one and a half** space between lines and a **2.5 cm (1 inch)-wide margin**. Authors are strongly advised to follow the manuscript preparation guidelines provided below.

### 1. FORMAT FOR ORIGINAL ARTICLE (RESEARCH REPORT)

- **Title:** brief, specific, informative, and written in English. It must contain a **maximum of 20 words** with the first letter in each word capitalized.
- **Name(s) of Author(s):** should include author(s)' full name(s) and ORCID ID logo hyperlinked to the author(s)' ORCID ID page.
- **Affiliation(s):** listed sequentially using a number (<sup>1</sup>) and the name of the department(s) to which the author(s) are affiliated (including the city and the country).

#### Example:

Alfian Nur Rosyid<sup>1</sup>, Han Chen Tsu<sup>2</sup>, Sergey Tjulandin<sup>3</sup>, and Koichi Matsuda<sup>4</sup>

<sup>1</sup> Department of Pulmonology and Respiratory Medicine, Faculty of Medicine, Universitas Airlangga, Surabaya - Indonesia

<sup>2</sup> Department of Respiratory Medicine, Shanghai Chest Hospital, Jiao Tong University, Shanghai - China

<sup>3</sup> Department of Clinical Pharmacology and Chemotherapy, N. N. Blokhin Russian Cancer Research Center, Moscow - Russia

<sup>4</sup> Division of Pulmonary Medicine, Department of Medicine, Kobe University, Kobe - Japan

**The manuscript for Original Article should not exceed 4000 words (exclude Abstract and References).**

- **Abstract:** The manuscript should contain an abstract that is self-contained and citation-free, written in English around **200-250 words**. It consists of introduction, methods, results, and conclusion.
- **Keywords:** Consists of **3-5 words** in English, started with a capital letter (sentence case) without an ending point, and must contain at least one keyword of [Sustainable Development Goals \(SDGs\)](#). Keywords should apply terms present in [Medical Subject Headings \(MeSH\)](#).
- **Introduction:** State the rationale for the study, a brief description of the background that led to the study, identify the main problem, and explain the study purpose. Establish a gap in the current knowledge, state the novelties, and convince the readers that the gap has been addressed. It should contain **no more than four (4) paragraphs** without subheadings. Current results and conclusions should not be included.
- **Methods:** Explain in detail about the research design, settings, time frame, variables, population, samples, sampling methods, instruments, data analyses, and information on ethical clearance. This chapter may be divided into sections if several methods are used.
- **Results:** This section may be further divided into subsections with subheadings. Describe the significance of your findings and the most important part of your manuscript. Follow a logical stream of thought. The total number of tables and figures is advisably **no more than six (6)**.
- **Figures:** Cite figures in ascending Arabic numerals according to the first appearance in the manuscript file. The original format must be in JPEG and not be smaller than 300 dpi. Figures require a label with Arabic numerals in order (e.g., “Figure 1”, “Figure 2”, and so on) and a brief descriptive title to be placed below the figure, center-aligned. Do not submit your figures in separate files.
- **Tables:** Cite tables in ascending Arabic numerals according to the first appearance in the manuscript. Tables require a label with Arabic numerals in order (e.g., “Table 1”, “Table 2”, and so on) and a brief descriptive title to be placed above the table. Do not submit your tables in separate files.
- **Discussion:** The authors should explain the result of the study, not repeating the results, and how the results answered the research problem. Differences and similarities with previous studies should be elaborated. State the limitation of the study and the possibilities for developing further studies. Limitations of the study should also be mentioned in this section.
- **Conclusion:** This should clearly explain the main conclusion of the manuscript, highlighting its importance and relevance as well as suggestion or recommendation for further research.
- **Acknowledgments:** Those who contributed to the work but do not meet the authorship criteria should be listed in the Acknowledgments with a description of the contribution.
- **Conflict of Interest:** All manuscripts submitted to JR must be accompanied by a conflict of interest disclosure statement or a declaration by the authors that they do not have any conflicts of interest to declare.
- **Funding Statement:** The authors should state how the research was funded in this section, including grant numbers if applicable.
- **Authors' Contributions:** All authors have contributed to all processes in this research, including preparation, data gathering and analysis, drafting, and approval for publication of this manuscript.

- **References:** References should be prepared according to **Vancouver** style and numbered consecutively in the order in which they are cited in the text. References are identified in the text by Arabic numerals in superscript and are always cited after dots or commas. Preferably use references from scientific articles (with issues **not exceeding the last 5 years**) and textbooks **maximum published in the last 10 years**. The authors must use reference management software to write citations and references, such as [Mendeley®](#), [Zotero®](#), and [EndNote®](#).

## 2. FORMAT FOR CASE REPORTS

- **Title:** brief, specific, informative, and written in English. It must contain a **maximum of 20 words** with the first letter in each word capitalized.
- **Name(s) of Author(s):** should include author(s)' full name(s) and ORCID ID logo hyperlinked to the author(s)' ORCID ID page.
- **Affiliation(s):** listed sequentially using a number (1) and the name of the department(s) to which the author(s) are affiliated (including the city and the country).

## Example:

<sup>3</sup> Department of Clinical Pharmacology and Chemotherapy, N. N. Blokhin Russian Cancer Research Center, Moscow - Russia

<sup>4</sup> Division of Pulmonary Medicine, Department of Medicine, Kobe University, Kobe - Japan

## The manuscript for Case Report should not exceed 3500 words (exclude Abstract and References).

- **Abstract:** The manuscript should contain an abstract that is self-contained and citation-free, written in English around **200-250 words**. It consists of introduction, case, and conclusion.
- **Keywords:** Consists of **3-5 words** in English, started with a capital letter (sentence case) without an ending point, and must contain at least one keyword of [Sustainable Development Goals \(SDGs\)](#). Keywords should apply terms present in [Medical Subject Headings \(MeSH\)](#).
- **Introduction:** State the rationale for the study, a brief description of the background that led to the study, identify the main problem, and explain the study purpose. Establish a gap in the current knowledge, state the novelties, and convince the readers that the gap has been addressed. It should contain **no more than four (4) paragraphs** without subheadings. Current results and conclusions should not be included.
- **Case:** This section contains the medical case about the patient's condition, time frame, disease progression, laboratory findings, different diagnose and treatments uprightly. Explain the assessment and the decision chosen to treat the patient.
- **Figures:** Cite figures in ascending Arabic numerals according to the first appearance in the manuscript file. The original format must be in JPEG and not be smaller than 300 dpi. Figures require a label with Arabic numerals in order (e.g., "Figure 1", "Figure 2", and so on) and a brief descriptive title to be placed below the figure, center-aligned. Do not submit your figures in separate files.
- **Tables:** Cite tables in ascending Arabic numerals according to the first appearance in the manuscript. Tables require a label with Arabic numerals in order (e.g., "Table 1", "Table 2", and so on) and a brief descriptive title to be placed above the table. Do not submit your tables in separate files.
- **Discussion:** The authors should explain the result of the study, not repeating the results, and how the results answered the research problem. Differences and similarities with previous studies should be elaborated. State the limitation of the study and the possibilities for developing further studies. Limitations of the study should also be mentioned in this section.
- **Conclusion:** This should clearly explain the main conclusion of the manuscript, highlighting its importance and relevance as well as suggestion or recommendation for further research.
- **Acknowledgments:** Those who contributed to the work but do not meet the authorship criteria should be listed in the Acknowledgments with a description of the contribution.
- **Conflict of Interest:** All manuscripts submitted to JR must be accompanied by a conflict of interest disclosure statement or a declaration by the authors that they do not have any conflicts of interest to declare.

- **Funding Statement:** The authors should state how the research was funded in this section, including grant numbers if applicable.
- **Authors' Contributions:** All authors have contributed to all processes in this research, including preparation, data gathering and analysis, drafting, and approval for publication of this manuscript.
- **References:** References should be prepared according to **Vancouver** style and numbered consecutively in the order in which they are cited in the text. References are identified in the text by Arabic numerals in superscript and are always cited after dots or commas. Preferably use references from scientific articles (with issues **not exceeding the last 5 years**) and textbooks **maximum published in the last 10 years**. The authors must use reference management software to write citations and references, such as [Mendeley®](#), [Zotero®](#), and [EndNote®](#).

### 3. FORMAT FOR LITERATURE REVIEWS

- **Title:** brief, specific, informative, and written in English. It must contain a **maximum of 20 words** with the first letter in each word capitalized.
- **Name(s) of Author(s):** should include author(s)' full name(s) and ORCID ID logo hyperlinked to the author(s)' ORCID ID page.
- **Affiliation(s):** listed sequentially using a number (1) and the name of the department(s) to which the author(s) are affiliated (including the city and the country).

## Example:

Alfian Nur Rosyid<sup>1</sup>, Han Chen Tsu<sup>2</sup>, Sergey Tjulandin<sup>3</sup>, and Koichi Matsuda<sup>4</sup>

<sup>1</sup> Department of Pulmonology and Respiratory Medicine, Faculty of Medicine, Universitas Airlangga, Surabaya - Indonesia

<sup>2</sup> Department of Respiratory Medicine, Shanghai Chest Hospital, Jiao Tong University, Shanghai - China

<sup>3</sup> Department of Clinical Pharmacology and Chemotherapy, N. N. Blokhin Russian Cancer Research Center, Moscow - Russia

<sup>4</sup> Division of Pulmonary Medicine, Department of Medicine, Kobe University, Kobe - Japan

## The manuscript for Literature Review should not exceed 4000 words (exclude Abstract and References).

- **Abstract:** The manuscript should contain an abstract that is self-contained and citation-free, written in English around **200-250 words**.
- **Keywords:** Consists of **3-5 words** in English, started with a capital letter (sentence case) without an ending point, and must contain at least one keyword of [Sustainable Development Goals \(SDGs\)](#). Keywords should apply terms present in [Medical Subject Headings \(MeSH\)](#).
- **Introduction:** State the rationale for the study, a brief description of the background that led to the study, identify the main problem, and explain the study purpose. Establish a gap in the current knowledge, state the novelties, and convince the readers that the gap has been addressed. It should contain **no more than four (4) paragraphs** without subheadings. Current results and conclusions should not be included.
- **Review:** This section can be further divided into sub-sections. Explain the topic with sufficient and scientific evidence. Follow a logical stream of thought. Thus, the interpretation can be drawn.
- **Figures:** Cite figures in ascending Arabic numerals according to the first appearance in the manuscript file. The original format must be in JPEG and not be smaller than 300 dpi. Figures require a label with Arabic numerals in order (e.g., "Figure 1", "Figure 2", and so on) and a brief descriptive title to be placed below the figure, center-aligned. Do not submit your figures in separate files.
- **Tables:** Cite tables in ascending Arabic numerals according to the first appearance in the manuscript. Tables require a label with Arabic numerals in order (e.g., "Table 1", "Table 2", and so on) and a brief descriptive title to be placed above the table. Do not submit your tables in separate files.
- **Summary:** This should clearly explain the main summary of the manuscript, highlighting its importance and relevance as well as suggestion or recommendation for further research.
- **Acknowledgments:** Those who contributed to the work but do not meet the authorship criteria should be listed in the Acknowledgments with a description of the contribution.
- **Conflict of Interest:** All manuscripts submitted to JR must be accompanied by a conflict of interest disclosure statement or a declaration by the authors that they do not have any conflicts of interest to declare.
- **Funding Statement:** The authors should state how the research was funded in this section, including grant numbers if applicable.
- **Authors' Contributions:** All authors have contributed to all processes in this research, including preparation, data gathering and analysis, drafting, and approval for publication of this manuscript.

- **References:** References should be prepared according to **Vancouver** style and numbered consecutively in the order in which they are cited in the text. References are identified in the text by Arabic numerals in superscript and are always cited after dots or commas. Preferably use references from scientific articles (with issues **not exceeding the last 5 years**) and textbooks **maximum published in the last 10 years**. The authors must use reference management software to write citations and references, such as [Mendeley®](#), [Zotero®](#), and [EndNote®](#).

## ENGLISH EDITING SERVICE

Appropriate use of English is a requirement for review and publication in **JR**. For non-native speakers, professional English editing services may help improve the presentation of the manuscript prior to journal submission.

Examples of external professional services are:

1. [Enago](#)
2. [Proofed](#)
3. [Proofers](#)
4. [Proofreading](#)
5. [London Proofreaders](#)
6. [Native Proofreading](#)
7. [ImaTransproof](#)

Please note that using an external professional service for English editing **does not guarantee** publication in **JR**, but for non-native speakers, it is **recommended** to improve the quality of the manuscript presentation prior to peer-review. Even when external services are used, the sole and final responsibility regarding the manuscript content remains with the authors, and the use of any editing service must be disclosed in the Acknowledgment section, together with funding received for these services when applicable.

## **SUBMISSION PREPARATION CHECKLIST**

As part of the submission process, authors are required to check off their submission's compliance with all of the following items, and submissions may be returned to authorsthat do not adhere to these guidelines.

1. The submission has not been previously published, nor is it before another journal for consideration (or an explanation has been provided in Comments to the Editor).
2. The submission file is in OpenOffice, Microsoft Word, RTF, or WordPerfect document file format.
3. Where available, URLs for the references have been provided.
4. The text uses 1.15 line spacing and 12-point font, employs italics rather than underlining (except with URL addresses), and all illustrations, figures, and tables are placed within the text at the appropriate points rather than at the end.
5. The text adheres to the stylistic and bibliographic requirements outlined in the [Guidelines for Authors](#), which is found in About the Journal.
6. If submitting to a peer-reviewed section of the journal, the instructions in [Ensuring a Blind Review](#) have been followed.

## **COPYRIGHT NOTICE**

1. The journal allows the author to hold the copyright of the article without restrictions.
2. The journal allows the author(s) to retain publishing rights without restrictions
3. The legal formal aspect of journal publication accessibility refers to Creative Commons Attribution Share-Alike (CC BY-SA).
4. The Creative Commons Attribution Share-Alike (CC BY-SA) license allows re- distribution and re-use of a licensed work on the conditions that the creator is appropriately credited and that any derivative work is made available under “the same, similar or a compatible license”. Other than the conditions mentioned above, the editorial board is not responsible for copyright violation.

## **PRIVACY STATEMENT**

The names and email addresses entered in this journal site will be used exclusively for the stated purposes of this journal and will not be made available for any other purpose or to any other party.

## PEER REVIEW PROCESS

**Jurnal Respirasi** uses **double-blind review**, which means that both reviewer and author identities are concealed from the reviewers, and vice versa, throughout the review process. The article review process usually takes an average of **10 weeks**. This review period depends on the editors' and reviewers' duration in reviewing the manuscript. The reviewer's decision will be considered by the Board of Editors to determine the ensuing process of the manuscript.

In the case when two independent peer-reviewers have opposing decisions, the **third peer-reviewer** will be asked to review the manuscript and his/her decision will be final for determining whether the manuscript is accepted or rejected. The time allocated for the third peer-reviewer is **two (2) weeks**.

The practice of peer review is to ensure that only good manuscripts are published. It is an objective process at the heart of good scholarly publishing and is performed by all reputable scientific journals. All manuscripts in **Jurnal Respirasi** follow the procedures as shown below:

## **PUBLICATION FREQUENCY**

**Jurnal Respirasi** is published **three times** in a year (**January, May, & September**) and contains **9 (nine) articles** in each number of volume.

## **OPEN ACCESS POLICY**

This is an open access journal that all content is available for other users. Users are allowed to read, download, copy, search, print, or link to the full texts of the articles, without asking prior permission from the publisher or the author.

This journal provides immediate open access to its content on the principle that makes researches available freely to the public and supports a greater global exchange of knowledge.

## **ARCHIVING**

This journal utilizes the LOCKSS system to create a distributed archiving system among participating libraries and permits those libraries to create permanent archives of the journal for purposes of preservation and restoration. [More...](#)

## **PLAGIARISM STATEMENT**

The editors of **Jurnal Respirasi** will screen all submitted manuscripts for plagiarism using **Turnitin** plagiarism checker. This journal does not accept any plagiarism in any manuscripts or it will be rejected immediately. The manuscript is passed if the similarity is less than 20%.
