## I. DESCRIPTION

---

JUXTA: Jurnal Ilmiah Mahasiswa Kedokteran Universitas Airlangga is a scientific peer-reviewed medical journal relevant to doctor and other health-related professions by the Faculty of Medicine Universitas Airlangga, Indonesia. JUXTA provides a forum for original articles, and it is published twice a year, every January and August. Studies focusing on evaluating and understanding the complex medical importance are welcomed in JUXTA.

Editors will suggest how to publish the journals, removals, or additions that could strengthen the argument of the manuscripts. We aim to establish an editorial process that is accurate and consistent, not pompous or tedious. Authors are allowed to write and present the article according to their ideas.

Our committee has the highest ethical standards in medical research. Therefore, it is required for authors to provide specific information such as authorship and conflict of interest, including the studies that are adhered to general standards.

The benefits of JUXTA for the authors are:

- A highly respected journal in the medical field.
- Rapid initial screening according to the editor's interest.
- The articles will be indexed in ISSN and e-ISSN journals and major databases of the Indonesian Publication Index (IPI), Google Scholar, DOAJ, and Bielefeld Academic Search Engine (BASE).

## II. FOCUS AND SCOPE

---

JUXTA focuses on publishing original research reports on the latest medical sciences. The scope of JUXTA includes basic health sciences, clinical medicine, healthcare and education in medicine, and also public health sciences.

## III. OPEN ACCESS STATEMENT

---

This is an open access journal that all contents are available for other users. Users are allowed to read, download, copy, search, print, or link the full texts of the articles, without asking prior permission from the publisher or the author.

## IV. EDITORIAL BOARD

---

**Editor-in-Chief**  
Prof. Dr. Budi Santoso, dr., Sp. OG(K)

*Universitas Airlangga, Indonesia*

**Honorary Editor**

Dr. Achmad Chusnu Romdhoni, dr.,  
Sp.T.H.T.K.L(K), FICS  
Dr. Hanik Badriyah Hidayati, dr.,  
Sp.S(K)  
Dr. Sulistiawati, dr., M.Kes.

*Universitas Airlangga, Indonesia*

*Universitas Airlangga, Indonesia*

*Universitas Airlangga, Indonesia*

**Editorial Board Members**

Prof. Gustaaf Albert Dekker, MD.,  
Ph.D., FDCOG., FRANZCOG  
Prof. Togas Tulandi, MD., MHCM.,  
FRCSC., FACOG  
Prof. Liang-Yo Yang,  
DVM., Ph.D.  
Prof. Dr. dr. Ari Fahrial  
Syam, SpPD-KGEH.,  
MMB, FINASIM, FACP,  
FACG  
Prof. Dr. dr. Wachyu Hadisaputra,  
Sp.OG-KFER

## V. AUTHOR GUIDELINES

---

The manuscript is submitted directly to the website. The submitted manuscript has not been published elsewhere and is only considered in JUXTA. Authors are requested to have ORCID ID upon submission in JUXTA.

### ARTICLE TYPE

JUXTA only considers original articles. The format for the manuscript should be in .docx format. The manuscript **should not exceed 3500 words (excluding Abstract and References)** with tables/figures **up to five (5)** and references up to **35**. Use Arial sized 9, except title sized 14, authors' names sized 11, and affiliations sized 9. Use single-spaced in two columns. All manuscripts **must be submitted in American English**. Define abbreviations only at the first appearance in the text. Use standard abbreviations based on [Medical Subject Headings \(MeSH\)](#). We recommend using the equation function in Microsoft processor. Single variables (e.g., “ $a^2 + b^2 = c^2$ ”), other symbols (e.g.,  $\beta$  or  $\Delta$ ), or mathematical operators (e.g.,  $x$ ,  $\geq$ , or  $\pm$ ) are not typed using the equation function. SI units are used. Write using italics (e.g., *Homo sapiens*) with complete the genus and species, both in the title and at the first mention of an organism in the manuscript. After the first mention, the first letter of the genus name followed by the full species name may be used (e.g., *H. sapiens*).

### COVER PAGE

In the cover page, the authors have to provide information on their names, affiliations, e-mails, phone numbers, ORCID IDs, and their contributions to the making of the manuscript. The cover page can be downloaded [here](#).

### MANUSCRIPT STRUCTURE

The structure of the manuscript submitted to JUXTA is as follows:

- Manuscript title, authors' names, and affiliations
- Abstract
- Keywords
- Introduction
- Methods
- Results
- Discussion
- Conclusion
- Acknowledgments
- Conflict of interest
- Funding statements
- Authors' contributions
- References

## **Manuscript Title, Authors' Names, and Affiliations**

The following information must be included:

- Manuscript title

The title should be specific, concise, and comprehensible. It should be written **in English in sentence case and contain a maximum of 30 words.**

- Full authors' names

The manuscript has a main author and co-authors. Authors' names should not contain academic titles or ranks. At least one of the authors is required to add their [ORCID ID](#). The link should be embedded on the ORCID ID logo after the authors' names.

- Corresponding author

Indicate the corresponding author clearly with an asterisk symbol (\*) after the corresponding author's name. A corresponding author is a person who is responsible for handling correspondence with the Editorial Board in the whole process of pre- and post-publication of the manuscript.

- Authors' affiliation(s)

The affiliations are listed sequentially using a number (<sup>1</sup>) and the name of the department(s) to which the authors are affiliated (including the city and the country).

## **Abstract**

The manuscript should contain a structured abstract that is **self-contained and citation-free**. The abstract comes after the title and authorship information in the manuscript. It should be written **in English of no more than 250 words**. It consists of introduction, methods, results, and conclusion.

## **Keywords**

The keywords consist of **3-5 words** in English, starting with a capital letter (sentence case) without an ending point, and must contain at least **one keyword** of [Sustainable Development Goals \(SDGs\)](#). Keywords should apply terms present in [Medical Subject Headings \(MeSH\)](#).

## **Introduction**

State the rationale for the study, a brief description of the background that led to the study, identify the main problem, and explain the study purpose. Establish a gap in the current knowledge, state the novelties, and convince the readers that the gap has been addressed. It should contain no more than **four (4)** paragraphs without subheadings. Current results and conclusions should not be included.

## **Methods**

Explain in detail the research design, settings, time frame, variables, population, samples, sampling methods, instruments, data analyses, and information on the ethical clearance. This chapter may be divided into sections if several methods are used.

## **Results**

Describe the significance of your findings and the most important part of your manuscript. Follow a logical stream of thought. The total number of tables and figures is advisably **no more than five (5)**.

## **Figures**

Cite figures in ascending Arabic numerals according to the first appearance in the manuscript file. The original format must be in JPEG and not be smaller than 300 dpi. Figures require a label with Arabic numerals in order (e.g., "Figure 1", "Figure 2", and so on) and a brief descriptive title to be placed below the figure, center-aligned. Do not submit your figures in separate files.

## **Tables**

Cite tables in ascending Arabic numerals according to the first appearance in the manuscript. Tables require a label with Arabic numerals in order (e.g., “Table 1”, “Table 2”, and so on) and a brief descriptive title to be placed above the table. Do not submit your tables in separate files.

## **Discussion**

The authors should explain the result of the study, not repeating the results, and how the results answered the research problem. Differences and similarities with previous studies should be elaborated. State the limitation of the study and the possibilities for developing further studies.

## **Strength and Limitations**

The authors should mention the strength and limitations of the study in this subsection.

## **Conclusion**

This should clearly explain the main conclusion of the manuscript, highlighting its importance and relevance as well as suggestion or recommendation for further research.

## **Acknowledgments**

Those who contributed to the work but do not meet the authorship criteria should be listed in the Acknowledgments with a description of the contribution.

## **Conflict of Interest**

All manuscripts submitted to JUXTA must be accompanied by a conflict of interest disclosure statement or a declaration by the authors that they do not have any conflicts of interest to declare.

## **Funding**

The authors should state how the research was funded in this section, including grant numbers if applicable.

## **Ethical Clearance**

The authors should clearly mention the ethical clearance of the study, which includes the one who gave the ethical clearance, the number of the ethical clearance, and the date in which the ethical clearance was released.

## **References**

References should be prepared according to **Vancouver** style and numbered consecutively in the order in which they are cited in the text. References are identified in the text by Arabic numerals in superscript and are always cited after dots or commas. Preferably use references from scientific articles (with issues **not exceeding the last 5 years**) and textbooks **maximum published in the last 10 years**. The authors must use reference management software to write citations and references, such as [Mendeley®](#), [Zotero®](#), and [EndNote®](#).

**SUBMISSION**

Submit your manuscript through our website submission.

**VI. POLICY AND REVIEW PROCESS**

---

**Plagiarism Statement**

This journal does not accept any plagiarism in any manuscripts or it will be rejected immediately. This journal uses **Turnitin** to detect plagiarism. The manuscript is passed if the similarity is less than 20%. However, the final decision regarding plagiarism in this journal abides to [COPE](#).

**Article Processing Charge**

a. Article Submission Fee : IDR 0 / USD 0

No charge for manuscript submission.

b. Article Processing Charge: IDR 0 / USD 0

No charge for processing the manuscript.

**Peer Review Process**

This journal uses a double-blind review method, which means that both reviewer and author identities are concealed from the reviewers, and vice versa, throughout the review process by at least 2 independent peer-reviewers. The article review process usually takes an average of 10 weeks. This review period depends on the editors and reviewers in reviewing the manuscript. The practice of peer review is to ensure that only good manuscripts are published. It is an objective process at the heart of good scholarly publishing and is performed by all reputable scientific journals.
