GUIDELINES FOR AUTHORS OF MAJALAH BIOMORFOLOGI (BIOMORPHOLOGY JOURNAL)

Majalah Biomorfologi (Biomorphology Journal) is published twice a year in one volume. Manuscripts submitted must contain original ideas that have never been published or presented in any form and anywhere and not in a review or under consideration to be published by other parties. The journal accepts manuscripts in American-English with proper grammar. The use of grammar-checker applications is mandatory for any non-native authors. The manuscript should be written by the structure as in the [Document Template](#). The Document Template includes an Author's Declaration form that the manuscript does not contain fabricated, falsified, and plagiarized text and/or data, that the manuscript has never been published before and is not under consideration for publication by another party, and that all authors have agreed on the final form of the manuscript. All authors involved in making the manuscript must sign the statement sheet outlined by [ICMJE](#). The authors should also attach ethical eligibility (ethical clearance) for original research from their institution or local authority the [Patient Consent for Publication form](#) for the case study or case series; and also the [Title Page](#) as well as the [Cover Letter](#). All authors are obliged to follow [Guideline for Author](#), the [Submission Checklist](#), and to sign the [Authors' Declaration form](#). **The author(s) cannot withdraw any submitted manuscript that has been sent to the peer reviewers.**

The manuscript must be free of typing errors and have a proportional length. The length of each manuscript is 5-10 pages of A4 size paper (1.5 spaces, Times New Roman font size 11, with normal margins page layout of 2.54 cm on each side). The recommended references are the updated ones in the last ten (10) years from the date of current submission (minimum of 20 references), unless in a special case accepted by the editors due to scientific reasons.

Total number of tables and figures should be limited, advisably no more than five. Tables should be numbered with Arabic numbers. The title of each table should be written center-aligned at the top of the table, in normal Times New Roman, font size 11, ended with period (.). Text within tables should be written in 1 space, normal Times New Roman font size 9 or less. Figures (including graphs, diagrams, charts, drawings, and photographs) should be produced at least 300 dpi in jpg, jpeg, or png format, have clear legends, numbered with Arabic numerals, and the title of each figure should be written center-aligned at the bottom of the figure, in normal Times New Roman, font size 11, ended with period (.). All words in Latin must be written in italics. The use of abbreviations is generally agreed upon, and an extension must be given in the first mention of the abbreviation. Decimal numbers are marked with points (.).

All types of manuscripts must consist of:

1. **Title**, which must be concise, specific, and informative. The title must consist of no more than 30 words, written on the top line with bold Times New Roman font size 13, center-aligned, and the first letter of each word in the title is capitalized, except for articles and conjunctions. Latin name is italicized (italic).
2. **The authors' names** are complete (without title) and the home institutions of the authors are written with an initial capital letter for each word in Times New Roman font, size 11, center-aligned, without ending points. The names of the authors are separated by commas. Numeric code in superscript is added behind each author's name. The author's home institution is written under the author's name beginning with a numeric code (superscript). The name of the institution is followed by the name of the city and the country where the institution is located. At least one of the authors is required to add their ORCID IDs listed on <https://orcid.org/> (see [template](#)). The link should be embedded on the ORCID logo () after the authors' names. At least 1 of the authors must include external (more than one, if necessary) affiliation(s) outside the MBIOMJ publisher (please see the published articles in our [archives](#)).
3. **Abstract** must be arranged with a brief description (containing no more than 250 words). The abstract is written in English:

- a. abstract of original research report, systematic review & meta-analysis, systematic review, and scoping review must consist of background, objective, material and method, result, and conclusion written in one paragraph.
- b. abstract of case series or case report & scoping review must consist of background, objective, case(s), scoping review, discussion, and conclusion, written in one paragraph.
4. **Keywords** consist of 3-5 words and/or phrases, written on the left side of the abstract as seen in [the template](#), in English, started with a capital letter (sentence case), and without an ending point. The keywords must contain at least one keyword of [Sustainable Development Goals \(SDGs\)](#).
5. **Running title** (short version of full title or abbreviated title) must be written as a header of the manuscript on the right side.
6. **Correspondence** is written under the keywords, including the name and email address of one of the authors responsible as corresponding author.
7. **Highlights** of the manuscript, which consist of minimally two keypoints representing the novel contributions of the study and must not be the copy-paste and/or repetition of sentences of any other parts of the manuscript. These highlights should be written before the background using number bullets ([see template](#)).

The sections according to each type of manuscript are as follows:

- a. **Original Research Report** consists of the following sections:

Background
 Objective
 Material and Method
 Result
 Discussion
 Strength and limitations
 Conclusion
 Acknowledgment
 Conflict of interest
 Ethic Consideration
 Funding
 Author Contribution

- b. **Systematic Review and Meta-Analysis** consists of the following sections:

Background
 Objective
 Material and Method
 Result
 Discussion
 Strength and limitations
 Conclusion
 Acknowledgment
 Conflict of interest
 Funding
 Author Contribution

- c. **Scoping Review** consists of the following sections:

Background
 Objective
 Material and Method
 Result
 Discussion

Strength and limitations
Conclusion
Acknowledgment
Conflict of interest
Funding
Author Contribution

d. **Case Series with Scoping Review Discussion** consists of the following sections:

Background
Objective
Case(s)
Scoping review
Discussion
Strength and limitations
Conclusion
Acknowledgment
Conflict of interest
Patient Consent for Publication
Funding
