## **INTRODUCTION TO THE EDITOR**

*Media Gizi Indonesia (MGI) is a scientific journal published regularly every 4 months that provides articles regarding the research and the development of nutrition knowledge including community nutrition, clinical nutrition, institutional nutrition, food service management, food technology, and current issues on food and nutrition. Media Gizi Indonesia tries to always present a variety of novel scientific articles in the scope of Nutrition and Health.*

*For this volume MGI provides original research and literature review in the field of nutrition, dietetics, and food science. The theme for original research varies from pediatric nutrition, nutrition for productive women, food product development, to food security. To date, children and young women nutrition has become more attention because a good nutritional status in that period will manifest a better quality of further generation life. For that, this current edition of MGI presents several best research related to child and young women nutrition. Besides presenting studies related to pediatric nutrition, the current edition of MGI also shows research in function food product development to provide better food product in order to alleviate nutritional problems.*

*We do hope MGI scientific journals can leverage the development of a writing culture and communicative scientific studies as well as attract readers and writers to participate in MGI for future issues. Media Gizi Indonesia will maintain its role in providing current, relevant, and topical issues in food and nutrition. Hopefully, the works displayed by MGI can provide benefits and enrich the readers' knowledge.*
