This journal is published once every 4 months: January, May, and September.

SUBSCRIPTION PRICE – does not include postage

IDR. 200.000,- for each copy

INTRODUCTION TO THE EDITOR

Media Gizi Indonesia (MGI) is a scientific journal published regularly every 4 months that provides articles regarding the research and the development of nutrition knowledge including community nutrition, clinical nutrition, institutional nutrition, food service management, food technology, and current issues on food and nutrition. Media Gizi Indonesia provides a variety of scientific articles in the scope of Nutrition and Health.

The recent volume consisted of original research in the field of nutrition throughout the lifecycle, which focuses on child nutrition and adolescent health. To date, child and adolescent nutrition has raised concerns since it manifests to a better quality of life during adulthood. The concern focused on the health impacts of preventable intergenerational nutrition issues in the earlier periods. For that, MGI presents relevant research related to anemia, children's growth, and dietary intervention to the selected population. Besides presenting studies related to child and adolescent nutrition, the current edition of MGI also shows research in food product development to provide better food products to alleviate nutritional problems. Furthermore, original research on food service management among athletes and nursing homes complements this volume.

We do hope MGI scientific journals can leverage the development of a writing culture and communicative scientific studies as well as attract readers and writers to participate in MGI for future issues. Media Gizi Indonesia will maintain its role in providing current, relevant, and topical issues in food and nutrition. Hopefully, the works displayed by MGI can provide benefits and enrich the readers' knowledge.
