# Media Kedokteran Hewan (Veterinary Medicine Journal)

Volume 34, No.1, January 2023

Media Kedokteran Hewan ([p-ISSN: 0215-8930](https://doi.org/10.20473/mkh.v34i1.2023)) ([e-ISSN: 2775-975X](https://doi.org/10.20473/mkh.v34i1.2023)) (established 1985) publishes all aspects of veterinary science and its related subjects. Media Kedokteran Hewan publishes periodically three times a year (January, May, and September). Media Kedokteran Hewan publishes original articles, review articles, and case studies in Indonesian or English, with an emphasis on novel information of excellent scientific and/or clinical quality, relevant to domestic animal species and biotechnology of veterinary medicine from researchers, lecturers, students, and other practitioners around Indonesia and worldwide.

## Editor in Chief

Yulianna Puspitasari, drh., M.VSc., Ph.D. Universitas Airlangga, Indonesia

## Associate Editor

Dian Ayu Permatasari, drh., M.Vet. Universitas Airlangga, Indonesia  
Dhandy Koesoemo Wardhana, drh., M.Vet. Universitas Airlangga, Indonesia

## Assistant Editor

Rosa Kartika Al Jihadi, K5 Perawatan Hewan Kota Kediri

## Editorial Board Members

Prof. Dr. Pudji Sianto, drh. M.Kes. Universitas Airlangga, Indonesia  
Prof. Dr. Widya Paramita Lokapirnasari, drh., MP. Universitas Airlangga, Indonesia  
Dr. Attaur Rahman, College of Animal Husbandry & Veterinary Sciences, Abdul Wali  
Khan University Mardan, Pakistan  
Dr. Shekhar Chhetri, DVM, M.Sc. Royal University of Bhutan, Bhutan

## Author Guidelines

Veterinary Medicine Journal is a journal that contains scientific articles on veterinary medicine and animal husbandry biotechnology published by Faculty of Veterinary Medicine Airlangga University 3 times per year on January, May and September. Veterinary Medicine Journal received manuscripts in the form of original research articles, review articles and case reports in Indonesian and English. Manuscripts received must be original, current and have never been published or are being planned to be published in other scientific journals.

Manuscripts must be submitted online through the Open Journal System (OJS) in Word format. The entire text is typed in Book Antiqua 11pt double spaced. The title is written with a Title case (bold, 14pt, align center). The full length of the manuscripts is a maximum of 12 pages of HVS paper. Italicize only for species names or terms that have not been standardized as Indonesian. Define abbreviations upon first appearance in the text. Do not use non-standard abbreviations unless they appear at least three times in the text. Keep abbreviations to a minimum. Avoid unnecessary duplication of text.

The first page contains titles in Indonesian and English, followed by full names of all authors without titles and initials (bold, center), followed by the name and complete address of the respective institution (marked with numeric superscripts) and e-mail of corresponding authors (marked with \*superscript).

The second page forward contain:

**ABSTRACT** in English and Indonesian, **INTRODUCTION, MATERIALS AND METHODS, RESULTS, DISCUSSION, CONCLUSIONS, APPROVAL OF ETHICAL COMMISSION, ACKNOWLEDGEMENTS** and **REFERENCES**.

**Title** should be concise but informative, as far as possible in no more than 12 words.

**Abstract** written in Indonesian and English, do not exceed 200 words, containing elements of background, material and methods, results and conclusions.

**Keywords** maximum of 5 (five) words or phrases, written after the abstract in each languages, alphabetically ordered. As far as possible avoid using keywords from the title.

**Introduction** should be brief, containing elements of background, problems, objectives and reference sources that support.

**Research materials** (materials and equipment) do not need to be mentioned separately, but rather integrated in the method used, complete with the brand and catalog number if applicable. Do not include common supplies, such as test tubes, pipette tips, beakers, etc. or standard laboratory equipment.

**Method** must be concise but sufficiently detailed (with reference or modification) so research can be repeated by other researchers.

**Results** are displayed in a concise but clear narrative with/without tables or figures.

**Tables** are made without vertical lines (use only lines at the top and bottom of the table as well as for separating heading from the main table), with table title placed before the table, numbered in Arabic numerals (**Table X**), and have to be referred in the text. The description of the table is placed after the table; it must be concise but clear enough so that the table separately can be understood without referring to the text. The table along with the title and description are placed after the References.

**Figures** presented are only those that support the findings of the study, and not restatement of data from tables in the form of figures. When resulted data in the form of figure is more informative, interesting or significant, presentation of data in table form is not required. Figure title is placed after the figure, numbered in Arabic numerals (**Figure Y**), and have to be referred in the text. The description of the figure is placed under the title of the figure; it must be concise but clear enough so that the figure separately can be understood without referring to the text. Image (in JPEG format) is sent in separate file. The title and description of the figure are placed after the References.

**Discussion** contains explanation of what are found related to **the importance of your study** and how it may be able to answer the research question, comparison of findings (internally, between research data, and externally, compared with findings from other studies) and cause-effect analysis.

**Conclusion** does not only repeat the results of the study, but summarize the findings into a narrative that impacts on the development of science and/or practitioners in the field of veterinary reproduction.

**Approval of Ethical Commission** have to be stated (number and institution) if the manuscript is constructed based on a research using live animals.

**Acknowledgements** are delivered to the research funders (state the name, number and recipient name of the grant, if applicable), and to those who have helped carry out the research.

**References** are sorted alphabetically based on the author's last name. The *titles of journals* should be *abbreviated* according to the style *used* by each journal. Sixty (60%) scientific journal/article and (40%) text book.

Roitt, I., J. Brostoff, and D. Male. 2005. Immunology. 6<sup>th</sup> Ed. Black Well Scientific Pub. Oxford.

Staropoli, I., J.M. Clement, M.P. Frenkiel, M. Hofiung and V. Deuble. 2006. Dengue-1 virus envelope glycoprotein gene expressed in recombinant baculovirus elicits virus neutralization antibody in mice and protects them from virus challenge. Am.J. Trop. Med. Hygi; 45: 159-167.

**Review article**

Veterinary Medicine Journal received review articles on topics included in the scope of the journal which are of current interest. Reviews are invited by the editor. The review must be a comprehensive analysis and perspective on the state of the field and where it is heading. Reviews will be subject to the same peer review process as is applied for original papers. The manuscript is arranged in the same way as the original article with an unstructured abstract (maximum of 200 words). The number of references is limited to 50-70, with 75% of them have to be from publications in the past 10 years. The total length should not exceed 12 pages (HVS paper, double spaced 11pt Book Antiqua).

### **Case reports:**

Veterinary Medicine Journal receives quality and interesting case reports with topics included in the scope of this journal. All reports are peer reviewed as is applied for original articles. All instructions are the same as for the original articles.
