Media Kedokteran Hewan (Veterinary Medicine Journal)

Volume 36, No.2, May 2025

Media Kedokteran Hewan ([p-ISSN: 0215-8930](https://doi.org/10.20473/mkh.v36i2.2025)) ([e-ISSN: 2775-975X](https://doi.org/10.20473/mkh.v36i2.2025)) (established 1985) publishes all aspects of veterinary science and its related subjects. Media Kedokteran Hewan publishes periodically three times a year (January, May, and September). Media Kedokteran Hewan publishes original articles, review articles, and case studies in English, with an emphasis on novel information of excellent scientific and/or clinical quality, relevant to domestic animal species and biotechnology of veterinary medicine from researchers, lecturers, students, and other practitioners around Indonesia and worldwide.

Author Guidelines

Veterinary Medicine Journal is a journal that contains scientific articles on veterinary medicine and animal husbandry biotechnology published by Faculty of Veterinary Medicine Airlangga University 3 times per year on January, May and September. Veterinary Medicine Journal received manuscripts in the form of original research articles, review articles and case reports in Indonesian and English. Manuscripts received must be original, current and have never been published or are being planned to be published in other scientific journals.

Manuscripts must be submitted online through the Open Journal System (OJS) in Word format. The entire text is typed in Book Antiqua 11pt double spaced. The title is written with a Title case (bold, 14pt, align center). The full length of the manuscripts is a maximum of 12 pages of HVS paper. Italicize only for species names or terms that have not been standardized as Indonesian. Define abbreviations upon first appearance in the text. Do not use non-standard abbreviations unless they appear at least three times in the text. Keep abbreviations to a minimum. Avoid unnecessary duplication of text.

The first page contains titles in English, followed by full names of all authors without titles and initials (bold, center), followed by the name and complete address of the respective institution (marked with numeric superscripts) and e-mail of corresponding authors (marked with *superscript).

The second page forward contain:

ABSTRACT in English, **INTRODUCTION, MATERIALS AND METHODS, RESULTS, DISCUSSION, CONCLUSIONS, APPROVAL OF ETHICAL COMMISSION, ACKNOWLEDGEMENTS, AUTHOR'S CONTRIBUTION, CONFLICT OF INTEREST, DATA AVAILABILITY STATEMENT** and **REFERENCES**.

Title should be concise but informative, as far as possible in no more than 12 words.

Abstract written in English, do not exceed 200 words, containing elements of background, material and methods, results and conclusions.

Keywords maximum of 5 (five) words or phrases, written after the abstract in each languages, alphabetically ordered. As far as possible avoid using keywords from the title.

Introduction should be brief, containing elements of background, problems, objectives and reference sources that support.

Research materials (materials and equipment) do not need to be mentioned separately, but rather integrated in the method used, complete with the brand and catalog number if applicable. Do not include common supplies, such as test tubes, pipette tips, beakers, etc. or standard laboratory equipment.

Method must be concise but sufficiently detailed (with reference or modification) so research can be repeated by other researchers.

Results are displayed in a concise but clear narrative with/without tables or figures.

Tables are made without vertical lines (use only lines at the top and bottom of the table as well as for separating heading from the main table), with table title placed before the table, numbered in Arabic numerals (**Table X**), and have to be referred in the text. The description of the table is placed after the table; it must be concise but clear enough so that the table separately can be understood without referring to the text. The table along with the title and description are placed after the References.

Figures presented are only those that support the findings of the study, and not restatement of data from tables in the form of figures. When resulted data in the form of figure is more informative, interesting or significant, presentation of data in table form is not required. Figure title is placed after the figure, numbered in Arabic numerals (**Figure Y**), and have to be referred in the text. The description of the figure is placed under the title of the figure; it must be concise but clear enough so that the figure separately can be understood without referring to the text. Image (in JPEG format) is sent in separate file. The title and description of the figure are placed after the References.

Discussion contains explanation of what are found related to **the importance of your study** and how it may be able to answer the research question, comparison of findings (internally, between research data, and externally, compared with findings from other studies) and cause-effect analysis.

Conclusion does not only repeat the results of the study, but summarize the findings into a narrative that impacts on the development of science and/or practitioners in the field of veterinary reproduction.

Approval of Ethical Commission have to be stated (number and institution) if the manuscript is constructed based on a research using live animals.

Acknowledgements are delivered to the research funders (state the name, number and recipient name of the grant, if applicable), and to those who have helped carry out the research.

Author's Contribution mentions the assignment of each author, including tasks such as Conceptualization; Methodology; Software; Validation; Formal analysis; Investigation; Resources; Data Curation; Writing - Original Draft; Writing - Review & Editing; Visualization; Supervision; Project Administration; and Funding Acquisition

Conflict of Interest is used to inform readers whether the authors have any financial, personal, or professional conflicts of interest that could influence the research or its outcomes.

Data Availability Statement informs the readers about the accessibility of the data used in the research. Authors can state whether the data is available for sharing, and if so, how it can be accessed.

References are sorted alphabetically based on the author's last name and chronologically by the year of publication, following the Harvard Style format. The composition of references should consist of approximately 80% from journals and 20% from textbooks or other sources. It is recommended that the references are from the last

5 years. A minimum of 20 references is required, preferably journals from ScienceDirect or other reputable sources. Example of reference format:

Scientific Article:

Faruque, S.M., Albert, M.J. and Mekalanos, J.J., 1998. Epidemiology, genetics, and ecology of toxigenic *Vibrio cholerae*. *Microbiology and molecular biology reviews*, 62(4), pp. 1301-1314.

Textbook:

Roitt, I., Brostoff, J., and Male, D., 2005. Immunology. 6th Ed. Black Well Scientific Pub. Oxford.

Review article

Veterinary Medicine Journal received review articles on topics included in the scope of the journal which are of current interest. Reviews are invited by the editor. The review must be a comprehensive analysis and perspective on the state of the field and where it is heading. Reviews will be subject to the same peer review process as is applied for original papers. The manuscript is arranged in the same way as the original article with an unstructured abstract (maximum of 200 words). The number of references is limited to 50-70, with 75% of them have to be from publications in the past 10 years. The total length should not exceed 12 pages (HVS paper, double spaced 11pt Book Antiqua).

Case reports:

Veterinary Medicine Journal receives quality and interesting case reports with topics included in the scope of this journal. All reports are peer reviewed as is applied for original articles. All instructions are the same as for the original articles.

Vol. 36 No.2 May 2025

LIST OF CONTENT

	Page
1. Clinical Signs and Laboratory Markers Compete Favorably with Antigen Detection of Canine Parvovirus-2 in Dogs	110-122
Olatunde Babatunde Akanbi, Fagbohun Olusegun, Aderonke Rachael Kolawole, Olanrewaju Samuel Olaifa, Victor Aliyu, Pius Stephen Ekong, Oluwafemi Babatunde Daodu, James Olopade, Victor Olusegun Taiwo.	
2. Multi-Drug Resistant (MDR) Detection in <i>Escherichia coli</i> in Canary Birds (<i>Serinus canaria</i>) Imported from Malaysia	123-136
Izzatul Istiana, Mustofa Helmi Effendi, Muhammad 'Ahdi Kurniawan, Fifin Kunia Sari, Tri Endah Purbowati, Dina Agylia Rahmandari, Mufasirin, Boedi Setiawan, Dadik Rahardjo.	
3. Cholesterol, HDL, and LDL Content in Quail Egg Yolk with Probiotics and Acidifier Feeding	137-148
Andreas Berny Yulianto, Koesnoto Supranianondo, Kartika Purnamasari.	
4. The Antiproliferative and Spermicide Effects of D-Limonene on Gonadal Function in Male Albino Rats: A Comprehensive Study on Spermatogenesis and Gonadal Morphometry	149-162

Akbar Dimas Herdiansyah, Neo Raka Yudistira, Nadya Ashila Afandik, Nazwa Meiliza, Kresna Ryan Ardhiansyah, Trilas Sardjito, Samira Musa Sasi.

5. Identification of Gram-Negative Bacteria in the Oral Cavity of *Homalopsis buccata* 163-172

Ratih Novita Praja, Aditya Yudhana, Ezanti Nur Amelia, Alfian Dzaka Fadhil Ramadhan, Elham Zahrudin, Puji Aris Setiawati, Raissa Amelia Yumna, Zahrotul Andini, Roslindawani Md Nor.

6. Multi-Drug Resistant (MDR) Detection in *Klebsiella Pneumoniae* in Canary Birds (*Serinus canaria*) Imported from Malaysia 173-188

Tri Endah, Mustofa Helmi Effendi, Muhammad 'Ahdi Kurniawan, Izzatul Istiana, Fifin Kurniasari, Dina Agylia Rahmandari.

7. Ameliorative Effects of *Borreria Verticillata* Aqueous Extract on Adenium obesum Stem Bark Extract-Induced Histopathological Response of The Gill, Intestine, Liver, and Kidney in *Clarias gariepinus* (Burchell 1822) Juveniles 189-202

Benedict Olurotimi Muiyiwa, Sohnap James Sambo, Abdullateef Abiodun Ajadi, Usman Abdulrauf Adekunle.

8. Prophylactic study of Combination Ethyl Acetate Fraction of *Andrographis paniculata* Ness. and Dihydroartemisinin-Piperaquine (DHP) in Malarial Infected Mice 203-211

Hanifah Khairun Nisa, Aviatus Solikhah, Hani Plumariastuti.

9. Macroscopic Features of the Intugementary System of Geriatric Kintamani Dogs 212-219

Ni Putu Anggita Indrayani, I Nengah Wandia, I Wayan Nico Fajar Gunawan, Putu Devi Jayanti.

10. A Systematic Review on Feline Internal Medicine Articles of Indonesian Veterinary Journals 220-233

Jully Handoko, Alsi Dara Paryuni, Hadimas Bakti Pratama, Sayu Raka Padma Wulan Sari.
