Introduction

With thanks to Almighty God, finally volume 6 number 2 from July to December 2020 Record and Library Journal can finally be published. The Record and Library Journal (RLJ) is a scientific journal which is published periodically every six months. Journal record and library as a communication medium for disseminating scientific information from research results, case studies, book reviews, and literature reviews. The Record and Library Journal is targeted to be a source of scientific information for lecturers, researchers, students, practitioners, and general public who are interested in library science and archives. The Record and Library Journal receives original manuscripts both from research and literature reviews in the fields of library, archives, information and documentation. Record and Library Journal tries to always present a variety of scientific articles in the scope of library science and archives that are interesting and up to date.

This is one of the absolute requirements in submitting the accreditation of national scientific journals through the ARJUNA system so that it is hoped that the Record and Library Journal can be accredited and indexed in SINTA managed by Kementerian Riset dan Teknologi / Badan Riset dan Inovasi Nasional (Ministry of Research and Technology / National Research and Innovation Agency of Indonesia). In article volume 6 number 2, there are writers both domestically and abroad, the articles presented also vary from the literature review about electronic archives, information systems and research results with various topics such as: archive, record management, library promotion, digital, and information literacy skills

The existence of the Record and Library Journal scientific journal which is applying for national accreditation (SINTA) is expected to be a lever on the development of communicative writing culture and scientific studies as well as the allure of readers and writers to participate in the Record and Library Journal in future issues. Hopefully the thoughts and works displayed in the Record and Library Journal can provide benefits and enrich the treasury of knowledge for readers.
